E-LEARNING PROGRAM

SIITGO

FEATURES AND BENEFITS:

- **24/7 Unlimited Access (Online or Offline):**

We use top-rated open coursewares for training available 24/7 online from experienced educators and professionals.

The design of the coursewares offer a tremendous opportunity for individuals to learn comprehensively without the constraints of time and location.

You have unlimited access whether online or offline, the pdf and video formats are downloadable for offline learning suitable for students with limited internet access.

- **Login and Study Anywhere, Anytime at your own pace:**

Students have the opportunity to study from anywhere, anytime. Spare time can be turned into an educational experience whether it is at work, home or on the road.

The courseware is accessible from anywhere in the world where you have access to internet.

- **Self-Paced Interactive Learning:**

Our e-learning is completely self-paced so that students have complete control over study times as well as the speed of the course which assures learning flexibility.

Students can also review the material as often as they need to and with the ability to search the entire courseware on any keyword or phrase it is a great resource.

Our course materials are powered by carefully selected top coursewares online, designed on sound tutoring principles, from extensive research in instructional design, self-learning and information processing.

- **Practical [Web & Video] Lectures:**

The web coursewares provide both text, charts and image illustrations, depicting enough for vivid information and clarity about a topic or subject including Video Lectures for practical tutor-led training delivered by experienced tutors.

- **Industrial Training Experience**

We help improve your practicality and gain industry experience via our Industrial Training program.

Industrial Training is on the job training designed to help improve practical skills and gain industry experience on a course program.

If you are interested in our industrial training, you will be asked to print out an industrial training letter upon successful completion of the online training, this letter will be submitted to any organization that specializes in the area of your course program in your country for 4 - 8 weeks (or more depending on course) for freelance work and observation on your chosen course for real industry experience

Benefits of Industrial Training:-
1. Practical Skill Acquisition
2. Industry Experience
3. Job Opportunity
 [Industrial Training is optional].

- **Exam re-take is available for Free.**

Exam re-take is available without any additional fee or charge.

- **Earn I.T Diploma Certification:**

One of the benefits of our e-learning program is certification.
- A level of competence commonly accepted and valued by the industry.
- Many employers give preference in hiring applicants with certification.
- They view this as proof that a new hire knows the procedures and technologies required.

A Diploma Certificate will be issued in your name, emailed to you upon successful completion of the Online Exams.
The certificate is professionally designed; you can use high quality paper for printing or request for a print copy from us to be shipped to your physical address which attracts print and shipping fee.

The certification is personalized with your name, date, the title of the course and signed by our certifying officers.
See Sample Here.

- **100% Satisfaction Guaranteed:**

We are confident of our self-paced e-learning program considering the web-based lectures, video lessons from experienced educators and professionals including industrial training for industry experience, we guarantee 100% satisfaction.

The coursewares also provide you with search interface, course glossaries, quick references, detail links, notes and tips. Everything you need to increase your depth of understanding while retaining the information you need to be career successful.
